Applicant's election of Group I in Paper No. 3 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election of the CD40 ligand as the CD40 binding agent and election of CD80 and CD86 as the co-stimulatory molecule. However, in contrast to applicant's assertions, CD80 and CD86 are not the same species of co-stimulatory molecule. The structures, expression and modes of action of CD80 and CD86 differ. Therefore, it is ambiguous as to whether applicant intends to select CD80, CD86 or the combination of CD80 and CD86. In addition, it is not clear that the specification as filed provides sufficient written support for the combination of CD80 and CD86. To avoid a new matter rejection if applicant intends to elects the combination of CD80 and CD86, applicant needs to point to a basis in the specification for the combination of CD80 and CD86 in the claimed methods. See MPEP 714.02 and 2163.06.

Therefore, applicant's election is not fully responsive to the prior Office Action because of the issues above. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).**
